

# Boulder Creek Pools & Spas

## More Pool for Your Money

Boulder Creek Pools & Spas have specialized in custom pool design and remodels since 2000. Michael Paluscio, the owner-operator, is dedicated to creating custom quality pools with significant savings. His approach in designing and building pools and spas uses a cost-plus method to create a unique custom design within your budget and to make pool building simple.

Boulder Creek Pools & Spas specializes in constructing pool environments, custom water features, grottos, and fire features. The company's 3D designs are "virtually" as real as your final pool – hear the water, see the fire, get in the pool and look at it from every angle. Once the final drawing is approved – you will see the total estimated cost and the contractor's flat fee. When your pool is completed, you will receive a "final bill" with actual invoices presented next to the estimated cost. The actual cost is less than the estimate 99% of the time (excluding customer's changes during construction). There are no hidden fees or additional markup.

Boulder Creek Pools & Spas is a family-owned business with low overhead. They maintain high standards by using licensed contractors and the highest quality and most reliable equipment. Paluscio follows the project from inception to completion

"...dedicated to creating custom quality pools with significant savings."

working directly with clients, landscape architects and custom home builders. Boulder Creek Pools & Spas will give you a lot more pool for your money and when you work with the owner, you get the best service, too.
